# AIS-140 Datasheet

**ft. fleetly**

## Background

Government of India have evidenced the sudden growth of vehicles on roads during this decade and it has become a key challenge for governments to keep up with demands of the infrastructure with citizens demands such as Better roads, Emergency services etc.

This chaos has created more accidents, difficulty reaching emergency services on time and security to vulnerable people at evenings and night. These issues have led the Government departments to think and come up with a strategy to address and improve safety to the public.

## What is AIS 140?

Automotive Industry Standard #140 (AIS-140) is an integral part of Intelligent Transportation System (ITS) for Public and commercial vehicle operations mandated by the Government of India from 1st January 2019 for all new vehicle registrations.

AIS-140 (IRNSS) is set of standards published by ARAI (Automotive research association of India) that mandates the requirement for vehicle tracking device along with emergency button (s) must exist in all public sector vehicles, passenger transits, school transport and commercial vehicles.

MORTH (Ministry of Road Transport & Highways) have been working with all statement governments to implement command and control centres and link vehicle GPS Trackers with the Government servers to help and reach the vehicles in the event of emergencies.

## How Fleetly can help?

Fleetly provides 100% compliant AIS-140 solution to fleet owners with its comprehensive fleet management system AI

ICAT
Innovation • Service • Excellence

ARAI CERTIFIED AIS140

WHO NEEDS TO COMPLY ?
