

fleetly

India's #1 Telematics & Vehicle CC TV Solution

Institutional Transportation Solution

Schools & Colleges

Agenda

- Introduction
- Vehicle Tracking & AIS-140 Compliance
- A complete solution
- Why Fleetly?
- Q&A

Fleetly – Institutional Transportation System

Fleetly comprehensive software enables school fleets gain complete control over operational aspects of vehicles and pupil. With Fleetly, Vehicle location tracking, route planning, location sharing, pupil attendance, and vehicle safety and more are at a click away. The solution is fully compliant with Government of India's AIS-140 mandate.

Vehicle Location Tracking (VLT)

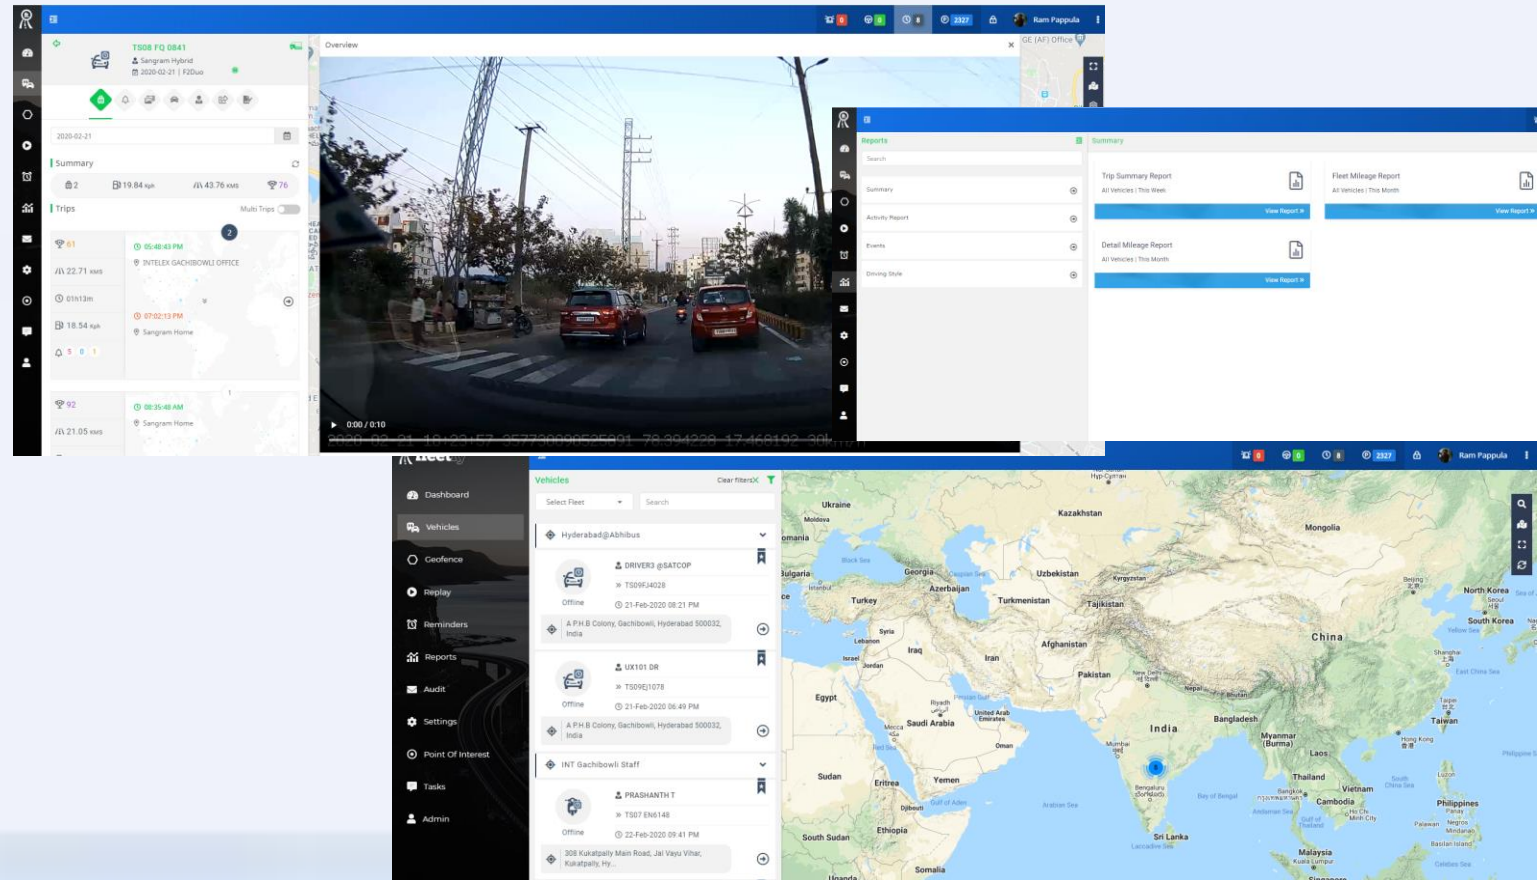

Device uses satellite based location technology (GPS) to determine and record the precise location of a vehicle at regular intervals. The location data so determined can be stored within the device, and/or can be transmitted to the Backend Control Centre using a wireless communication modem built in the device.

Safety & Compliance

With Fleetly, provide complete safety and compliance to students and drivers. RFID reader solution enables student tracking with ease and driver monitoring systems with the help of HD Cameras enables driver coaching to make fleets safer.

Geo-fence & Location Sharing

Reduce parent enquiries on arrival and departure timings of transportation vehicles by directly giving access to parents on their child route vehicle location tracking and location sharing with the authorized users

Real time vehicle location Tracking

Our Fleetly platform solutions helps Device uses satellite based location technology to determine and record the precise location of a vehicle at regular intervals in real time.

Route Planning & Optimization

Fleetly platform Enables transport department to schedule the shortest Route plans & number of pickup points in a trip.

Route plans helps drivers to avoid traffic congestion and maintain time management.

Geofences – Vehicle Deviation Alerts

Create geographical fences on map to notify movement of vehicles or assets in real time when vehicle exits or enter from drawn location points.

Fuel usage Monitoring

Fleetly helps to reduce Fuel expenditures on your Fleet operations by productive monitoring and increase in savings.

DVR Dual Camera videos Technology

Dual Camera inward & outward camera technology helps in taking videos both outside & inside the vehicle. Storage Videos play a proof of event when ever any incident occurs.

Driver Behavior Analysis

Fleetly Driver behavior Analysis helps in monitoring the driving styles such as over speed, Aggressive driving, acceleration, braking etc..

Driver scoring helps him to reward or required any training sessions to improve his performance.

RFID Technology

RFID technology is integrated with Fleetly platform for safety of students. Students details is stored in Chip Id and when students get in or out of the bus notification will be sent to officials which helps to track safety of students.

Driver Monitoring System

DMS technology helps in monitoring the physical appearance of driver facial recognition such as getting sleep, smoking and alcoholic etc..

Service Reminders

Let Fleetly platform Notify your Vehicle reminders such as Vehicle Service, Insurance Renewal Due date & Pollution renewals.

Reports

A detailed summary of Driving style, Events & Trip reports available from great collection .Reports can be generated up to 7 days and can be downloaded in Csv ,Excel & PDF formats

Dashboards

Fleetly Detailed Dashboards data Provide metrics information to monitor & analyze productivity of your fleet operations effectively and easily.

Notifications

Get your Fleet Operation reminders Notifications through SMS, Email & to fleetly system.

How Fleetly is different from other platforms?

Fleetly is an internet of things (IoT) product, built with expandability in mind, platform runs on set of micro services and set to auto scale to meet the demand. The below are product advantages which distinguish fleetly from other competitors.

| S.No | Features | Fleetly | Others |
|------|---|---------|--------|
| 1 | Advanced Video Telematics Solution | Yes | No |
| 2 | Superior Video and G-Sensor data analytics | yes | No |
| 3 | Driver Risk management | yes | No |
| 4 | Driver Behavior Analytics & Driver coaching | yes | yes |
| 5 | Driver Monitoring System [DMS] | yes | No |
| 6 | Superior Reporting and Business Insights | yes | No |
| 7 | Latest AI ,ML& Cloud Based Technology | yes | No |
